

HF INLAY

HF Inlay relative LH Inlay, due to the increase of the frequency group, the data transmission speed is high, the antenna design is relatively simple tags are generally made from standard card shape.
Common applications: access control, asset recovery, materials management, medical applications, transportation, security monitoring, and other joint ticket.

HF Inlay basic characteristics:

- 1 read distance, stable performance
- 2 write speeds, signal responsive
- 3 can be designed in any size label specifications, to meet the different needs of users
- 4 labels diverse materials, soft, can be arbitrary package
- 5 multiple readers simultaneously, with the anti-collision function

HF INLAY Parameters:

Materials: paper/PVC/PET /

Frequency: 13.56MHZ

Working pattern: can read write

Standards: ISO 14443, ISO 15693, 18000

Read and write distance: 3-5cm (HF ISO14443). 3-100cm (HF ISO15693). Distance and antenna size of label and read and write.

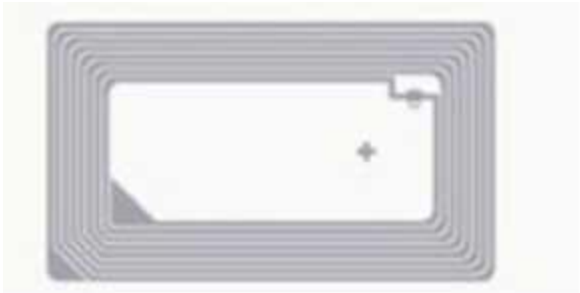

Data storage: > 10 years

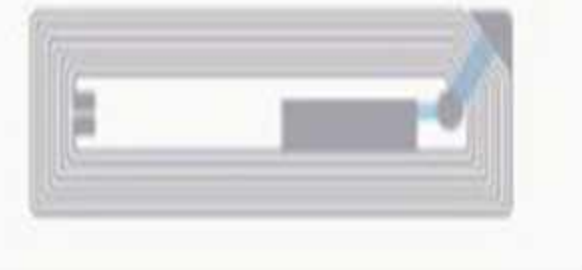

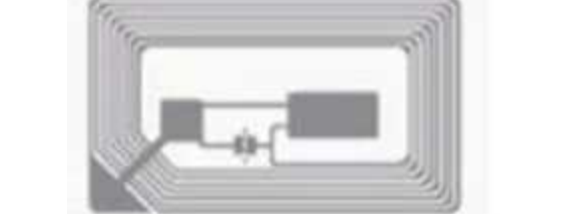

Read/write number: 100000

Wafer: NXP Ultralight / NTAG203 / I code sli/I code sliX / F08 / Ti2048

Wafer manufacturers: NXP, FMSH (Shanghai), Ti

Other processes: visual carbon film, magnetic stripe, print number, signature strip, barcode, etc
